## DIGITAL STILL CAMERA

### Big Performance Packed into an Amazingly Compact Body

At only 158g (without batteries) and not much bigger than a business card, the DC1000 sets a new standard in mobility for digital still cameras.

And with the flexibility of digital technology, you can edit and modify images you have shot on a PC in all kinds of ways. Whether for fun or for business, the DC1000 is a powerful new tool.

### “Shooting” and “Viewing” Photos Get More Fun with Digital

- There's no need for film or developing. Take as many shots as you like, without worrying about the cost.
- When the memory is full, just download pictures onto your computer or erase images you don't need.
- The DC1000's remarkably compact size makes it easy to take wherever you go.

Enjoy on-the-spot viewing with **1.8" Colour LCD**

No need to wait for developing. The DC1000's built-in monitor lets you see your pictures right after you take them. You can check each shot immediately.

**INCLUDED!**

### Digital Still Camera Station for Extra Creativity

Just connect to the station and to your PC or TV, you can enjoy your photos only possible with the digital way.

### View Photos on TV

\* Requires an NTSC 3.58 compatible TV.

Invite relatives or friends over to view recent or favourite photos.

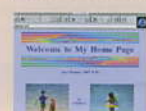

In business, give your presentations even more impact by a large screen.

### Transfer to PC

Edit your favourite scenes and make your own digital photo album.

Download images to a PC and use them to create your own internet home page.
