

English Version

Dimensions:

Length: 108 mm

Thickness: 12 mm

Weight: 118 grams

Screen:

3.4 inches wide angle LCD;

720 X 480 resolution; multi-touch operation

Colours:

Black/White

Memory/Storage:

Memory: 256MB

Built-in storage: 8GB/16GB

Camera:

3,200,000 pixels CMOS; custom 6 different photographic and video analysis model

Photo browser support for BMP, PNG, GIF, JPG, TIF format;

Earphones/Headset:

Microphone built-in stereo headphone wire

Frequency response: 50Hz to 20,000 Hz

Resistance: 32Ω

**Music:**

Frequency response: 20Hz to 20KHz,

Audio format support:

APE: Fast, Normal, High, Extra High

FLAC, WMA Lossless: VBR

OGG: Quality 0 ~ 10

WAV: PCM, MS-ADPCM

WMA: 8 ~ 355Kbps

MP3 (VBR): 8 ~ 320Kbps

AMR: AMR-NB

AAC: AAC-LC, AAC-HE

Users can customize the maximum volume limit

Video Playback:

Support for AVI, MP4, 3GP, MOV, ASF, WMV, MPEG, MKV, FLV file format,

H.264 Baseline Profile: 2.5Mbps bit rate,

720 × 480,30 frames / s; MPEG-4 Simple Profile: 2Mbps code Rate,

720 × 480,30 frames / s; WMV 3: 3.2Mbps bit rate,

720 × 480,30 frames / s; H.263: 1.5Mbps bit rate,

720 × 480,30 frames / s; DIVX: 5Mbps code Rate,

720 × 480,30 frames / s; XVID: 4Mbps bit rate,

720 × 480,30 frames / s; DX50: 6Mbps rate,

720 × 480,30 frames / s; MPEG-1: 1.5 Mbps bit rate,

720 × 480,30 frames / s; FLV: 500kbps bit rate,

720 × 480,30 frames/s;

**Frequency:**

GSM (900, 1800 MHz) , GPRS

Languages:

English: Simplified Chinese

International Keyboard Support:

English, Simplified Chinese

Battery:

Model BA1200, 1200mAh, 3.7V, lithium polymer batteries

Call Time: 370 minutes

Standby time: 179 hours with SIM cards, SIM cards without 374 hours

Video playback time: 7 hours

Music playback time: 21.5 hours

Box Contents:

MEIZU M8

With a stereo headset microphone EP20

PC connected to the USB cable

USB power charger

Product Manual experience

Clean cloth

MEIZU phone warranty certificate

Sensors:

Gravity sensing; ambient light sensor; distance infrared sensor;

As well as the touch sensor

Actual size and weight may be due to the configuration and the production process and have access to. Rechargeable battery-charging cycles is limited, may ultimately need to be replaced. 1GB = 10 billion Byte; after the format of the actual capacity may be reduced, and also occupied part of the operating system capacity. Video, audio, photography, multimedia images, and other relevant data are derived from in-house laboratory tests, for information purposes only. The use of the actual situation may be different. And the battery life test conditions Call: the battery completely full of electricity, using the default settings, the network signal a better place, with two M8 Unicom's use of two cards each other for testing. To allow mobile phone has been in a state of Kwan Ping-call, the record until the battery depletion automatic shutdown. Standby time: the battery completely full of electricity, use the default settings, and were inserted SIM card inserted measured. In the process of testing to maintain stand-by, often do not light up the screen, a daily check of the use of electricity. Records of the battery run out until the automatic shutdown. Video playback time: to complete the battery is full of electricity, use the default settings, without SIM card, video playback MP4 format with a resolution of 480 * 320, AAC 44.1khz, 128kbps audio format, the brightness is 60%, to close high-bass, volume 50% adjustment, headphone plug and play in a row, the record until the batteries run out completely shut down automatically. Music playback time: using the default settings, without SIM card to play MP3 format for the bit rate of 128kbps audio format, EQ closed and the closure of high-bass, adjust the volume to 50%, plug in headphones, single-screen clearance to play. Record until the battery automatically shut down completely run out of time. Note: The default settings are as follows: flight mode, GPRS are closed, open the phone to automatically adjust brightness to open.
