

Lexmark 120n ->configure Port ->Properties gir:

Innstallasjon:

Her stokker det seg. Printeren blir ikke funnet automatisk, men jeg skriver inn et tilfeldig valgt navn på porten samt IP adressa til printeren etter å ha klikke på «Add Port» . Dette har i hvertfall funka et par ganger.

Lexmark E120/E120n

Drivers and Utilities

The device is connected to:

Printer Name	IP Address
--------------	------------

Add Port

Select the printer you want to use. If your printer is not in the list, click **Add Port**.

Programs will be added to the Windows Firewall exceptions list for the Lexmark software to function properly.

Click **Finish** to complete driver installation.
